# Rsedgwic App Info 5

Test Credentials

- User Login: test@gmail.com
- User Password: toor

- Admin Login: johnSmith
- Admin Password: toor

Project Update

- Implemented DbSetup.java
  - was not completed in Assignment 4.
- Add New JSP Site Pages for Payment, Order Listing, and Administration
- Add OrderItem and Order Tables to the Database
- The My Orders link now pulls up the users orders if they are logging in, if not the link is not visible.
- If a user is not logging the are prompted to before checking out.
- The Confirm Payment Link now saves the order to the DB.
- Implemented logic for admin login
  - Admin Page allows user with admin privileges to view all orders.
  - **Admins login via the Admin link under the My Account drop down.**
    - Only visible if logged in as a normal User.
- Styling Overhaul
  - Imported bootstrap via CDN.
  - Updated Styles on all pages.
  - **Refactored Site Navigation !**
    - **My Orders** and **Admin Link** are only available if a user is logged in.
    - Logged Out

- Logged In

- Extra Credit: implemented register/login Logic.

○ Ideally I would have liked to combine the admin and user login, However since specific instructions were given for how to implement the admin login I kept them separate. .
